

PROSYSTEM LOW HEADROOM CRANES

OPTIMISED DESIGN FOR MAXIMUM UTILISATION OF AVAILABLE LIFTING HEIGHT

Single and double girder low headroom cranes are the optimal solution in production lines with height restrictions or where there is limited space. The bridge profile is raised between the tracks to maximise the available lifting height.

Single girder crane
(steel bridge and track)

Standard range*:
Rated capacity... 50 – 1500 kg
Span..... 1 – 8 m
Track..... 4 – 50 m
Hoisting..... 5 m

Single girder crane
(aluminium bridge and track)

Standard range*:
Rated capacity... 50 – 1000 kg
Span..... 1 – 8 m
Track..... 4 – 30 m
Hoisting..... 5 m

Double girder crane
(steel bridge and track)

Standard range*:
Rated capacity... 125 – 2000 kg
Span..... 1 – 8 m
Track..... 4 – 40 m
Hoisting..... 5 m

Double girder crane
(aluminium bridge and track)

Standard range*:
Rated capacity... 125 – 1000 kg
Span..... 1 – 8 m
Track..... 4 – 30 m
Hoisting..... 5 m
