

PROSYSTEM MONORAILS

Monorails are suitable for long production lines and can be equipped with curves and tailored solutions like turntables and track switches. They can be manually operated or equipped with electrical movements for the trolley, and they usually have an electric chain hoist to lift the load.

Steel monorails up to 1250 kg capacity can be equipped with curves. The curves can be connected to other curves or straight profiles.

SINGLE TRACK (STEEL)

Standard range*:

Rated capacity... 50 – 1500 kg
Track..... 1 – 50 m
Hoisting..... 5 m
